Gaurav Jain

Full Stack Developer

Jaipur, Rajasthan | jaingau01@gmail.com | +91 6376806029 | Portfolio | LinkedIn | GitHub

Summary

Full Stack Developer with 2.5+ years of experience building web, mobile, and desktop applications. Developed e-commerce features, LMS APIs, and admin tools using React, React Native, Node.js, and MongoDB; deployed web applications on AWS.

Experience

Code Your Electronics ↗ May 2025 – Present
Full Stack Developer Remote
part-time

- Built the company's MERN website with e-commerce, product catalogs, service listings, payments, authentication, and community features.
- Developed Electron.js desktop software for robotics and STEM products, using Arduino CLI to support code editing, compilation, and uploads to microcontrollers.
- Integrated a Groq-powered AI assistant to support coding, code review, debugging, and suggested corrections.
- Managed AWS deployment and hosting for the company's web applications.

Hope Web Solution Sep 2025 – May 2026
MERN Stack Developer Jaipur

- Developed database schemas, REST APIs, and service workflows for Aladdin's User, Vendor, and Admin applications.
- Built Aladdin's React admin dashboard with JWT authentication, role-based access control, token versioning, and global session logout.
- Contributed to development and maintenance of Experts4U, an AI-enabled online salon service application.
- Deployed applications on AWS EC2 with S3 media storage, Redis caching, and WebSocket-based real-time communication.

LearningBix Feb 2024 – May 2025
Full Stack Developer Jaipur

- Added an AI extension to BixCode ↗, a Scratch-based programming platform, and developed its mobile-responsive React interface.
- Developed Node.js, Express.js, and MongoDB APIs for LMS courses, student progress, assessments, and user management.
- Implemented JWT authentication, role-based access control, and database query optimization for the LMS.

Personal Projects

RepoGuardian AI — Automated Code Review System ↗

- Built a pull request review tool using Node.js, Next.js, Groq, and Octokit, with ESLint and Prettier checks, automated fixes, GitHub status checks, and Redis caching.

Tasktic — Project & Task Management Platform ↗

- Built a MERN task management platform with Admin, Manager, and Member roles, team management, task assignment, status tracking, and real-time chat using Socket.IO.

Technical Skills

Languages	JavaScript (ES6+), SQL
Frontend	React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, REST APIs, WebSockets, Socket.IO, JWT, RBAC
